# Analytical Balance

BA-H3204

Readability: 0.0001g  
Max. Capacity: 100g; 120g; 2000g; 210g; 220g; 320g  
Stable time: ≤8s  
Tare Function/Counting

## Description

It is an advanced electronic balance integrating precision, stability, multi-function and automation. It is widely used as an experimental instrument in the analytical industry, metallurgy, coal mining, food, colleges and universities and other fields.

## Features

- LCD screen
- Fully transparent design
- Clear and fast reading
- Adopt unique high-precision electromagnetic force balance force sensor and high-performance single-chip microprocessor system.
- Open menu, easy to operate
- Fully automatic fault detection
- Built-in RS232 communication interface can be connected to a computer or printer

## Main function

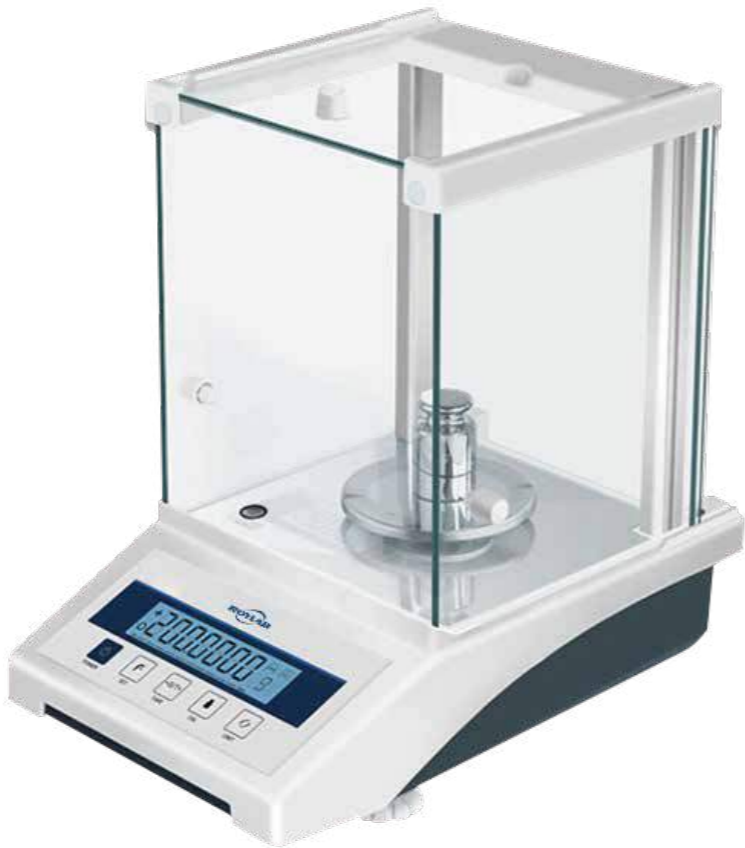

- Weighing unit conversion
  - Counting function
  - Automatic reminder of weighing value
  - Under weighing
- Automatic alarm function
  - Adjustable integration time
  - Adjustable sensitivity
  - Tare function

## Specifications

Model	BA-H3204
Accuracy level	Class I
Capacity	0~320g
Readability	0.0001g
Integration time (adjustable)	2. 5/5/10 s
Stable Time	≤8s
Electricity	220V external AC power adapter (DC6VX2A)
Pan size (mm)	Ø80
External dimensions (L*W*H)	366×230×340
Net weight	8kg

# 0.0001g Analytical Balance

BA-E2004 BA-E2104 BA-E2204

## Product details

## Description

- External calibration
- Electromagnetic force sensor
- LCD(White back light with black front)
- Tare function/Counting/Unit conversion
- Accumulation function/peak hold/Upper and lower set
- Dynamic weighing /Net and Gross/Clock function(optional)
- Sensitivity/Speed set/Percentage
- Density function
- Calibration time setting
- Overload alarm/Fault alarm/Level indicator
- Print function(baud rate setting,Continuous communication or press communication)
- Option:Density kit (solid/liquid)/printer

## Specifications

Model	BA-E1004	BA-E1104	BA-E1204	BA-E2004	BA-E2104	BA-E2204

## Description

High-precision electronic balances are widely used in scientific research, education, medical care, metallurgy, agriculture and other industries for measurement, analysis, and teaching. It is a high-precision weighing electronic balance produced by the introduction of foreign advanced technology. The key components are imported products. It has fast weighing speed, high accuracy, good stability, high quality and low price, simple operation and easy maintenance, and can be connected with external equipment such as computers and printers to improve work efficiency.

## Advantages

- Rear mounted electromagnetic force sensor, three door large windscreen, spacious weighing room. The internationally recognized high sensitivity and high stability rear mounted electromagnetic force sensor technology is adopted to obtain higher resolution.
- Fully automatic one-key internal calibration/external calibration technology, automatic timing calibration, automatic temperature change calibration. All-round elimination of errors due to temperature, environment, time, etc., to further optimize the performance of the balance.
- Large LCD white backlit display. The display mode can be switched between light and dark environments at will to protect eyesight.
- A variety of measurement units and counting weighing methods, unit conversion and data output: grams, carats, ounces, counting, percentage weighing, etc., suitable for different measurements.
- With overload / underload alarm, temperature compensation, full range peeling, accumulation / subtraction, bottom hook weighing (optional bottom hook).
- Equipped with RS232 output interface, it can be externally configured with computers, printers, etc. to fully meet the needs of laboratory quality analysis.

Semi-Micro Analytical Balance

BMA1265 BMA2285 BMA22105 BMA125 BMA165 BMA205

Reverse Side

Description

- 

Electromagnetic force recovery weighing system
- 

Multiple languages are supported: English, German, French, Italian, Spanish, Portuguese
- 

Large graphic display, easy and efficient operation
- 

Record the saved weight value in GLP/ISO format, including date, time, and serial number
- 

Recipe database: can store 99 recipes, each recipe contains up to 20 ingredients
- 

Large windshield glass cover, with 3 sliding doors, easy to operate the items to be weighed
- 

Highly integrated load cell
- 

Keyboard plastic protection

# Moisture Balance

BA-M500

## Description

The moisture analyzer can be widely used in all industries that need to quickly measure moisture. It can measure the moisture content of various samples such as solids, granules, powders, colloids and liquids to meet the requirements of laboratory and production processes in various industries. Rapid determination of content.

## Features

- The operation interface displays three curves at the same time, including moisture M, weight W, temperature T.
- The display screen adopts a 7-inch capacitive touch screen, which is intuitive, clear and responsive.

- The instrument has its own data storage function, which can store the latest 50 sets of measurement data, which is convenient for viewing historical records.
- The instrument has the communication function, and the standard RS232 communication interface is convenient for printing the results in real time.

- Simple, guided operation, no training required, laboratory or production line personnel can operate independently.
- It has the advantages of fast measurement, convenient operation and reliable data.

- The new measuring system, fast and professional.
- Using a special ring heating light source, the sample is heated more evenly, the drying is more thorough, the penetration ability is stronger, and the measurement is faster.

The instrument has powerful data processing functions, and the standard USB interface can be connected to a computer for operation to realize software analysis of moisture data. The software interface includes measurement curve, sample name, sample weight, test temperature, test time, record query, experimental data record printing, recording and export functions.

The instrument has four test modes, including automatic, timing, manual, and stage measurement. Stage measurement realizes the test of various samples at different temperature stages, and achieves a number of technological breakthroughs in the industry; the diversification of test modes can deal with a variety of samples testing needs.

Imported load cells solve weighing problems such as temperature drift and time drift, and improve measurement accuracy. The temperature control system adopts imported high-sensitivity temperature control components to ensure the accuracy and controllability of the temperature during the test.

- The instrument has a beautiful appearance, the appearance has patented technology, and the structure is compact.

- Zero consumables in the use process, stainless steel sample plate, reusable, energy saving and environmental protection

- Perfect after-sales service system, timely and quickly solve customer feedback problems.

- Display 12 parameters, including moisture %, solid content %, moisture curve, solid content curve, temperature curve; test duration, constant weight time, measurement mode, set temperature, measurement temperature, initial weight value, final weight value.

## Specification

Model	BA-M500
Weighing range	0-220g
Weighing accuracy	0.005g (5mg)
Moisture readability	0.01%
Temperature range	Start -225 C
Moisture measurement range	0.01~100%
Weighing sensor	Imported PW series sensor
Heating light source	Tungsten halogen ring heating light source
Heating mode	Fast
Test mode	Automatic, timed, manual, stage
Timing time range	1-360min (expandable)
Display parameters	Moisture %, solid content %, moisture curve, solid content curve, temperature curve; test duration, constant weight time, measurement mode, set temperature, measurement temperature, initial weight value, final weight value
Display language	English
Data storage	Store the latest 50 sets of measurement data (expandable)
Display curve	Simultaneously display three test curves (including moisture M, weight W, temperature T)
Sample pan dimension	Diameter:100 (mm)
Display	7 inch capacitive touch display
Communication interface	Standard RS232 communication interface and standard USB interface
Optional accessories	Micro printer and computer software
Product dimensions (L*W*H)	390*220*170 mm
Packing dimensions(L*W*H)	475*290*265 mm
Product net weight	3.65 kg
Package weight	5.2 kg

Specifications

Model	MCA110-T
Capacity	110g
Readability	0.001g
Operating Temp	5℃-35℃
Display	5 inch Touch Screen
Calibration	External Calibration
Interface	RS232/RJ45/USB...
Pan Size	Ø90mm
Packing Size	490x350x360mm
Gross Weight	7.5kg
Heating Source	Halogen Lamp-2
Temp. Sensor	PT100
Temp. Range	40℃-199℃
Temp. Step	1℃
Moisture Range	0.00%-100.00%
Moisture Readability	0.0001
Dry Range	100.00%-0.00%
Dry Readability	0.0001
Temp Setting	40℃-199℃ By 1℃ Step
Time Setting	1-99min By 10s
Number of Storage	20
Number of History	20
Heater	220V ±15% 50Hz/110V±15% 60Hz/400W
Balance	Input: 220V 50Hz/110V 60Hz Output:9V

## Description

- 

Design, utility model patents
- 

Large range and high precision
- 

Stainless steel large size scale
- 

AC and DC dual use
- 

Adjustable date and time
- 

Full range peeling and counting
- 

Check weight, percentage, density
- 

Net gross weight, sum
- 

Unit conversion: G\CT\OZ
- 

Overload alarm
- 

Link to PC\ Thermal Printer
- 

Optional adhesive label printer
- 

U disk import and export
- 

Within 10KG with internal calibration
- 

Expansion function: downhanging weighing, external display

Product details

Description

Full waterproof design、Quakeproof

IP68/CE/RoHS/LFGB certification

Full wash body, easy to clean

Speed weight, speed stability

Overload alarm

Stainless steel plate/load-bearing bracket

LED digital display/Double display

Waterproof and sealing glue mainboard、keypad display、sleeve sensor

Tare function/Counting

Check weighing

Unit conversion (g/kg/lb)...

AC and DC power supply

Long battery life

Optional power saving mode

Appearance design and utility model、Access to patents

Balance Scale

BA-W2BF

Features

It has a variety of unit conversion, counting, percentage, RS232, dynamic weighing, AC and DC, memory,etc.

High accuracy weighing, fast speed and stable for the operation.

Indicator can be apart from weighing plate. Indicator connection wire: 11.8"-59" (300-1500 mm can be selected according to your needs.)

Units: kg, g, oz, lb.

Specification

Model	BA-W2BF
Capacity	10kg
Readability	1g
Repeatability	2g
Linearity	+/-2g at max capacity
Stable Time	< 0.5s
Sensitivity	1g
Tare	0-max.
Speed	2~2.5s
Weighing Plate	Big square, 25*35cm, SST 304 plate
Material	ABS shell, stainless steel, aluminum sensor
Display	LCD(L*W) 4.3"*1.2" (110*30 mm)
Indicator Dimension (L*H)	10.2"*12.6" (260*320 mm)
Load Cell Dimension	5.2"*0.9"*1.2" (131*23*31 mm)
External Dimension(L*W*H)	320*300*350mm
Shipping Dimension(L*W*H)	380*220*350mm
N.W./G.W.	6/7kg

Description

- It is a kind of intelligence digital electronic balance which adopts high-stable load cell and high precision modulus convert IC system (AD), and integrated with single chip microcomputer.It is widely used in industry, agriculture, trade, schools and other fields for fast measurement of quality and quantity.
